Subject: Shelf life of Techspray products

To whom it may concern:

As a matter of policy, Techspray provides a specific shelf life on a limited number of products that have a defined period where they will remain functional. We do not provide arbitrary shelf life dates where test data does not support it. That would encourage unnecessary waste disposal, when the product may actually have years of additional functional life.

Under the warranty we will warranty/guarantee, with replacement product, that our products will remain functional. The warranty statement below is what we publish in our terms and conditions of sale.

Warranty:

"Techspray products are warranted to or a period of 12 months from the date of delivery except for WonderMASK PL Latex (2218), WonderMASK PX (2222), TC-527, TC-533, and cyanoacrylate products (2503-DP) which are warranted for 6 months from date of delivery. Techspray products used according to the printed instructions on the label or insert will perform correctly. Applications shown are for guidance only. Since Techspray has no control over the application, liability is strictly limited to replacement of product, or at Techspray's option, credit for the purchase price of the defective product. The warranties stated here are in lieu of all other warranties, written, oral, or statutory expressed or implied. Techspray expressly disclaims any warranty of merchantability or fitness for a particular purpose."

Shelf Life:

WonderMASK PL (2218-8SQ, 2218-G, 2218-5G), WonderMASK PX (2222-16SQ, 2222-G), TC-527 (53-4001-0527, 53-4003-0527), and TC-533 (53-4001-0533, 53-4003-0533, 53-4004-0533) are the only products in Techspray's product line that have a defined shelf life, which is 6-months. To calculate the remaining life of WonderMASK PL, WonderMASK PX, TC-527, or TC-533, add 6-months to the manufacturing date, which can be found on the barcode label of a case of 24, or on the bottom of each bottle:

Bottle date codes: ddd/yy, e.g. 100/09 = April 12, 2009
 yyddd, e.g. 09100 = April 12, 2009

Cyanoacrylate adhesives (aka "super glue", 2503-DP) have a shorter warranty because once opened/actuated, it is more likely that cured material will interfere with the product's proper function. This is not intended to suggest a defined shelf life of unopened/unactuated product.

If a shelf life needs to be defined in a users internal system (e.g. ISO9001), a date can be set based on the manufacturing date referenced above.

Please let us know if you have any questions or concerns.

Sincerely,

Kevin Pawlowski
