

Certificate

We hereby certify that the calibration attained / maintained by our **Weller®**

**WX, WT, WD, WSD, WS soldering series,
WXR, WR3, WXD, rework series**

with Soldering Tools

DS, DSX, DXV, LR, WP, WSP, WTP, WXDV, WXDP, WXP, WXTP series

is within 2 % of max set value of temperature as stated in our catalogues.

The idle temperature stability is within $\pm 2^{\circ}\text{C}$.

We certify that all Weller Hot Air Stations / Tools
WTHA1, WAD101, WHA series
are calibrated within a tolerance of $\pm 30^{\circ}\text{C}$.

The Tools fulfil all ESD-requirements to DIN EN 61340-5-1.

The Tools fulfil the requirements according to IPC-J-STD-001D.
EMC electromagnetic compatibility is according to
DIN EN (IEC) 55014-1 (Emission) and
DIN EN (IEC) 55014-2 (Immunity).

The Magnastats of the tips for the following Weller units
WTCP 51 / P 51 Soldering Station
W 61, W 101, W 201 Soldering Irons
have an accuracy of $\pm 3\%$ of the temperature.

We further certify that this calibration holds good for one year
from the date of the first use
and is traceable to national / international standards.
